barbiewoodshop Here's a quick woodworking trick. Finish or prefinish parts before assembly. It makes your life so much easier. I used shellac here.

NH: In one of your posts, Ken was delivering dinner to you in your workshop (or perhaps it was lunch?). You said it was because he knew better than to disturb you when you were working. He seems extraordinarily supportive!

I'd like for people to see me as a person woodworking, instead of a woman woodworking. Chromosomes have nothing to do with your abilities or potential in a woodshop. I believe many of my IG followers are kids or parents who show their kids what I've been working on. I hope to see more kids, both boys and girls, get into woodworking instead of only gaming and consuming social media. When you get into making things, you won't ever feel bored in life.
